-Parish Crime Rate as listed above is not a true parish crime rate due to voluntary participation of law enforcement agencies with the UCR system. The Parish Crime rates listed are calculated by adding the number of offenses reported and dividing that number by the population of the agencies reporting and multiplying by 100,000.

Note: The population figures for this chart were taken from a FBI report of agencies ORI codes for the UCR program. The student enrollees were taken from the 2006 FBI Crime in the United States report found online at <http://www.fbi.gov/ucr/cius2006/index.html>.

\* Indicates Police Departments that report through the Sheriff's Department

\*\*\*Orleans Sheriff reports through the New Orleans Police Department.

// Cities in two parishes

<sup>1</sup> The student enrollment figures provided by the United States Department of Education are for the 2006 school year, the most recent available. The enrollment figures include full-time and part-time students.

<sup>2</sup> The FBI does not publish arson data unless it receives data from either the agency or the state for all 12 months of the calendar year.

<sup>3</sup> Student enrollment figures were not available.

NOTE: Caution should be exercised in making any intercampus comparisons or ranking schools because university/college crime statistics are affected by a variety of factors. These include demographic characteristics of the surrounding community, ratio of male to female students, number of on-campus residents, accessibility of the campus to outside visitors, size of enrollment, etc.
